MESA – Cosmic Retro

Build retro-futuristic interiors with over 90+ hand-crafted, low-poly assets. This kit includes a wide selection of sci-fi props (from vending machines and consoles to beds and chairs), plus a modular wall & floor system for building immersive space station environments. Optimized for performance and ready to use in Unity (URP by default).

Key Features

92 FBX models & 100+ prefabs

Modular wall, column, door, and floor elements

Low-poly stylized aesthetic

1× 8×8 px texture (PNG) & 1 material

Optimized triangle counts

Drag-and-drop prefabs

Demo scene included (URP only)

Installation

Copy the CosmicRetroMesaPack folder into your Assets/ directory.

For URP (recommended)2 assign the URP asset in Project Settings > Graphics.

For HDRP / Built-in2 drag the corresponding config files from Render_Pipeline_Setups/.

Open the demo scene from Demo_Scenes/URP/ (URP only).

Drag any prefab from Prefabs/ into your scene and start building.
